SERVICE BRIEF

Exchange Email Hosting

Cloud email hosting eliminates the need for expensive hardware and on-premise management while providing the highest level of email communication.

Cloud Hosted Email

Remove the hassle and the costs involved with managing your own Microsoft Exchange server, our fully-hosted, fully-managed, full-featured email hosting solution.

Hosting your own Microsoft Exchange server in-house is an expensive endeavor that requires costly hardware, software, and regular management and maintenance. You can eliminate the hardware, space requirements, and startup costs needed to run your own Exchange server and greatly reduce management and maintenance fees.

Our hosted email solution offers utmost security, reliability, and scalability. Your organization can benefit from the full range of features Microsoft Exchange offers, such as calendar sharing, scheduling, web mail access, contact syncing, and of course, the world's highest standards for email.

Fully Supported Email Solutions

Have all of your bases covered with enhanced email services.

Enable your users to collaborate with Microsoft Outlook, sync their smartphones and tablets, and archive mail automatically. Exchange hosting can vastly increase your productivity with collaboration tools, meeting schedulers and much more. Best of all, your hosted Exchange server will be configured to the industry's best practices and security policies.

Spam Protection and Email Security

Regain control over your inbox and protect your network from unwanted junk mail.

Besides being a giant waist of time for businesses, spam is known for spreading harmful malware, viruses, and other attacks. Email Protection is a cost-effective, extremely powerful, 100% hosted solution with no software to install.

Email Protection, keeping track of Outlook filters and scrolling through spam messages are a thing of the past. The technology includes several layers of protection to block out viruses, phishing attempts, Denial of Service (DoS), Directory Harvest Attacks (DHA) and other security issues. Think of it as a firewall that applies specifically to your email.

Most importantly, it is all managed for you, and completely hosted along with your Exchange server, so you can focus on running your business, and not the technology that you use to manage your day-to-day.

FEATURES

- Highly scalable, flexible hosted IT solutions
- Includes server management, maintenance, and support
- Bypass the expensive initial costs and reduce your monthly IT costs
- Redundant and backed up to comply with business continuity above and beyond the industry standards
