

SERVICE BRIEF

Spam Protection - Regain Control over your Inbox

Prevent Virus-laden, Dangerous Emails from Entering your Organization, and Eliminate the Loss of Productivity that Comes with it.

How much does Spam cost your company?

You'd be surprised how much time is lost for junk mail. According to a recent study, 78% of all email sent is classified as spam. Other reports have claimed that US companies lose \$712 per employee each

year due to spam email despite the software spam filters that come with most email clients. How many employees do you have? Multiply that by \$712 and ask yourself if you'd like to continue sifting through spam and let junk email clog up your inboxes and exchange server.

Spam = Extra IT Issues

Besides being a giant time waster for businesses, spam is also known for spreading harmful malware, which will cause a lot of day-to-day IT issues. Stop letting unsolicited junk mail get between your staff and their jobs.

Tektonic Email Protection is a cost effective, extremely powerful, and 100% hosted solution with no software to install. Using intelligent pre-designed filters, malevolent email is stopped before entering your network, and anything questionable is quarantined and presented to you daily, so you never miss an important email that may have looked too spammy. You'll notice an

IMMEDIATE drop in junk email the moment Tektonic's Email Protection is turned on.

Stop Spam in its Tracks

With Tektonic Email Protection, keeping track of Outlook filters and scrolling through spam messages are a thing of the past. The technology includes several layers of protection to block out viruses, phishing attempts, Denial of Service (DoS), Directory Harvest Attacks (DHA), and other email attacks, think of it as a Firewall that applies specifically to your email. You will prevent these threats from entering your organization and vastly increase your staff's productivity.

“Don't just mark junk mail; prevent it.”

Productivity and Your Business, Reunited.

Imagine the time your company will get back when your users no longer need to wait for dozens, even hundreds of junk emails to download into their inboxes every morning, let alone go through them to sort out the wheat from the chaff. Above all else, Tektonic's Email Protection will proactively protect your communications infrastructure from phishing, denial of service, and directory harvest attacks, keeping your intellectual property safe and secure. Don't allow inappropriate and dangerous content into your enterprise.
